

# Double K Animal Clippers

*Reduce your clipping time – cool running handpiece,  
a must for tick cases or matted coats*

**Why?...** Because it runs at 1,000 revs faster than an Oster clipper and will breeze through a matted coat or a tick dog. The hand piece does not get hot and has more power than any other clipper (1/2 HP motor). Blades will last longer and you use your Oster, Andis or current blades. It's quiet and won't frighten horses.

- Motor, handpiece and 5ft cable (D8970) - \$950 plus GST
- Motor, handpiece and 7ft cable (D9000) - \$998 plus GST

*The 7ft cable allows the veterinarian to clip animals on the floor.  
Any length cable available as we build them! (Horses etc)*

The Double K is built in Australia by iM3 using a 1/2hp motor designed for Australian voltage and cycles. We carry a full range of parts for prompt service and quick in house repairs which are turned around the **same day**. The motor is designed to hang from the wall or sit on the ground.

The clipper is supplied with Triflow lubricant and a holder to secure the handpiece when not being used.

**Triflow 2oz** – This is a Teflon lubricant recommended for the higher speed of the blades on the Double K (also used with our dental handpieces)

T7980 - \$9.95 plus GST

The iM3 Double K is the choice of most Groomers and Veterinarians, it will pay for itself with the time it saves and the reduction in **burnt out** small animal clippers.

# iM3 NizeGuy

## ANIMAL DRYER

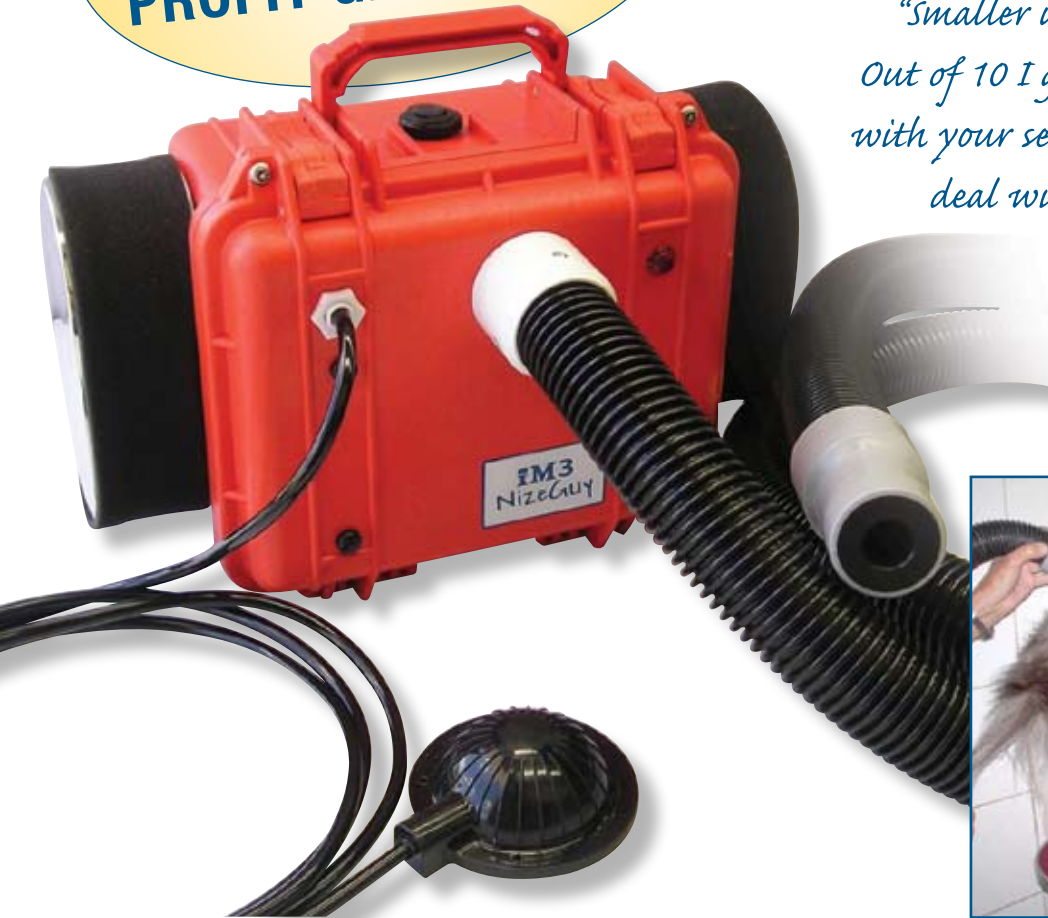

**TIME SAVER**  
*equals*  
**PROFIT GENERATOR**

*"Drying 6 animals took one hour less than before!"*

A PROFESSIONAL GROOMER\*

*"Smaller unit, lighter and dries faster. Out of 10 I give it a 20! I am very happy with your service... it is quicker for me to deal with you than locals (in Perth) and your people are very helpful and informative."*

A MOBILE DOG GROOMER HAD THIS TO SAY ABOUT THE NIZEGUY DRYER AND IM3\*

The iM3 NizeGuy removes the undercoat, leaving the hair fluffy and straight and not crinkled like heater dryers.

Designed to quickly remove water and dries in half the time of a stand dryer by using high velocity air rather than heating elements. It will dry a large dog in about 10 minutes (97% dry).

It has a powerful 2 speed 1400watt dual fan blower, dual filters on the air intake, as well as an air operated, water

proof foot switch with a 3 metre cord for easy operation – features exclusive to the iM3 NizeGuy dryer.

Designed and manufactured by iM3 with user and animal safety in mind and meets or exceeds European, New Zealand and Australian Electrical and Emission Standards.

**SPECIAL SUMMER OFFER**

Only **\$985** plus GST (D9800)

*Optional Stainless Steel Height Adjustable Stand available*

\* Both these groomers have used and have other brands of dryers.
